AUDITORS' REPORT

To the Shareholders of Egyptian Gulf Bank (S.A.E)

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of **Egyptian Gulf Bank (S.A.E)** which comprise the consolidated financial position as of December 31, 2021 and the related consolidated statements of income, comprehensive income, changes in equity and cash flows for the financial year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Consolidated Financial Statements

These consolidated financial statements are the responsibility of Bank's management. Management is responsible for the preparation and fair presentation of these financial statements in accordance with Central Bank of Egypt's rules pertaining to the preparation and presentation of the financial statements and measurement and recognition bases on December 16, 2008 and amended according to the instructions issued on February 26, 2019 and in light of the prevailing Egyptian laws. Management responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error. Management responsibility also includes selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with the Egyptian Standards on Auditing and in light of the prevailing Egyptian Laws. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement in the financial statements whether due to fraud or error. In making those risk assessments the auditor considers internal control relevant to the bank's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on these consolidated financial statements.

Opinion

In our opinion the consolidated financial statements referred to above present fairly in all material aspects of the consolidated financial position of **Egyptian Gulf Bank (S.A.E)** as of December 31, 2021 and of its financial performance and its consolidated cash flows for the year then ended in accordance with Central Bank of Egypt's rules pertaining to the preparation and presentation of the financial statements and measurement and recognition bases approved by its Board of Directors on December 16, 2008 and amended according to the instructions issued on February 26, 2019 and the Egyptian laws and regulations relating to the preparation of these consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below; these policies have been consistently applied to all the years presented, unless otherwise stated.

2.A Basis of preparation of the consolidated financial statements

These consolidated financial statements have been prepared in accordance with the instructions of the Central Bank of Egypt (CBE) rules approved by its Board of Directors on December 16, 2008; to under IFRS 9 "Financial Instruments" in accordance with the instructions of the Central Bank of Egypt (CBE) dated February 26, 2019.

These consolidated financial statements have been prepared in accordance with the applicable laws of Egypt.

Consolidated financial statements include the Bank as well as the following companies:

Egyptian Gulf Holding co.	99.99%
---------------------------	--------

The consolidated financial statements at December 31, 2018 have been prepared in accordance with the instructions of the Central Bank of Egypt (CBE) rules approved by its Board of Directors on December 16, 2008 and starting from January 01, 2019, the financial statements have been prepared according to Central Bank of Egypt (CBE) instructions dated February 26, 2019 to prepare financial statements according to IFRS 9 "Financial Instruments".

The accounting policies set out below have been changed by the management to comply with the adoption of mentioned instructions that described the changes in accounting policies in the following disclosers.

2.B Changes in accounting policies

The Bank applied the instructions of the Central Bank of Egypt (CBE) rules IFRS 9 "Financial Instruments" dated February 26, 2019 starting from January 01, 2019, the following summarize the main accounting policies changes resulted from applying the required instructions.

Classification of financial assets and financial liabilities

At initial recognition, Financial assets have been classified and measured according to amortized cost, fair value through other comprehensive income (FVTOCI) and fair value through profit or loss (FVTPL).

The financial assets have been classified according to how they are managed (the entity's business model) and their contractual cash flow characteristics.

The financial assets measured at amortized cost if it is not measured at fair value through profit or loss and the following two conditions met:

- The management intension maintaining the asset in business model to collect contractual cash flow and;
- This contractual conditions of financial assets will build cash flow in certain dates which limited only on payment of principle and interest (SPPI).

The debt instruments measured at fair value through other comprehensive income if it is not measured at fair value through profit or loss and the following two conditions met:

- The management intension maintaining the asset in business model to collect contractual cash flow or selling it and;
- This contractual conditions of financial assets will build cash flow in certain dates which limited only on payment of principle and interest (SPPI).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.B Changes in accounting policies – continued

The Bank may choose without return to measure equity investment which not classified trading investments to be as a fair value through other comprehensive income at initial recognition. And this choice will be made per each investment.

All other financial assets will be classified as fair value through profit or loss.

In addition to that, the bank may choose without return financial asset that will be measured at amortized cost or fair value through other comprehensive income to measured at fair value through profit or loss in the initial recognition, and in such a case that this reclassification will lead to prevent accounting mismatch.

Business model assessment

The Bank makes an assessment of the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice, specially to know whether these management policies concentrate to gain the contractual interest or reconcile financial assets period with financial liabilities period which finance these assets or target cash flow from selling the assets.
- How the performance of the portfolio is evaluated and reported to the Bank's management.
- The risks that affect the performance of the business model and the financial assets held within that business model and how those risks are managed.
- The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at fair value through profit or loss because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Impairment of financial assets

According to Central Bank of Egypt (CBE) instructions dated February 26, 2019 to implement IFRS 9 to replace impairment loss model recognized according to previous instructions dated December 16, 2008 with excepted credit loss (ECL).

Excepted credit loss is applied on all financial assets in addition to some financial guarantees and loan commitments.

According to IFRS 9; Expected credit loss will be recognized earlier than being applied by Central Bank of Egypt (CBE) instructions dated December 16, 2008.

The Bank apply three stages to measure expected credit loss on financial assets that are recognized at amortized cost and debt instruments that are recognized at fair value through other comprehensive income. The financial assets can transfer between three stages according to changes in credit quality since initial recognition.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.B Changes in accounting policies – continued

Stage 1: 12 months Expected Credit Loss

Stage 1 includes financial assets on initial recognition and that do not have a significant increase in credit risk since the initial recognition or that have low credit risk. For these assets, expected credit loss are recognized on the gross carrying amount of the asset based on the expected credit losses that result from default events that are possible within 12 months after the reporting date.

Stage 2: Lifetime Expected Credit Loss - not credit impaired

Stage 2 includes financial assets that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment. For these assets, lifetime expected credit loss are recognized, but interest is still calculated on the gross carrying amount of the asset.

Lifetime expected credit loss are the expected credit losses that result from all possible default events over the expected life of the financial instrument.

Stage 3: Lifetime Expected Credit Loss - credit impaired

Stage 3 includes financial assets that have objective evidence of impairment at the reporting date . For these assets, lifetime expected credit loss are recognized.

2.C Transactions Eliminated on Consolidation

Intra-group balances, and income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

2.D Loss of Control

Upon the loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments, depending on the level of influence retained.

2.E Investments in associates

An associate is an entity over which the Group has significant influence that is not control or joint control. Significant influence exists where the bank holds voting rights of 20% to 50% in an entity.

Acquisitions of Associates are accounted for using the purchase method; goodwill arising on acquisition of an associate, if any, is not presented separately, but is rather included within the carrying amount of the investment. Investments in associates are accounted for subsequently in the consolidated financial statements using the equity method.

According to the equity method, an investment in an associate is initially recognized in the statement of financial position at cost and is subsequently adjusted to recognize the Group's share in profit or loss, and other changes in the net assets, of the associate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.F Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments, A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns different from those of segments operating in other economic environments.

2.G Foreign currency translation

2.G.1 Functional and presentation currency

The financial statements are presented in Egyptian pound, which is the Bank's functional and presentation currency.

2.G.2 Transactions and balances in foreign currencies

The bank maintains its accounting records in Egyptian pound, Transactions in foreign currencies during the financial year are translated into Egyptian pound using the prevailing exchange rates on the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the end of the reporting period at the prevailing exchange rates, Foreign exchange gains and losses resulting from settlement and translation of such transactions and balances are recognized in the income statement and reported under the following line items.

- Net trading income through profit and loss from held-for-trading assets and liabilities or through profits and losses by type.
 - Other operating revenues (expenses) from the remaining assets and liabilities.
- Changes in the fair value of investments in debt instruments; which represent monetary financial instruments, denominated in foreign currencies and classified as available for sale assets are analyzed into valuation differences resulting from changes in the amortized cost of the instrument, differences resulting from changes in the applicable exchange rates and differences resulting from changes in the fair value, of the instruments. Valuation differences resulting from changes in the amortized cost are recognized and reported in the income statement in income from loans and similar revenues' whereas difference resulting from changes in foreign exchange rates are recognized and reported in 'other operating revenues (expenses)', The remaining differences resulting from changes in fair value are deferred in equity and accumulated in the 'Revaluation reserve of available-for-sale investments'.
- Valuation differences resulting from the non-monetary items include gains and losses of the change in fair value of such equity instruments held at fair value through profit and loss, as for recognition of the differences of valuation resulting from equity instruments classified as financial investments available for sale within the fair value reserve in equity.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.H Financial assets

2.H.1 Financial Policies applied starting from January 1, 2019

Financial assets classified as amortized cost, fair value through other comprehensive income (FVTOCI) and fair value through profit or loss (FVTPL).

The classification depends on the business model of the financial assets that are managed with its contractual cash flow and is determined by management at the time of initial recognition.

Financial assets classified as amortized cost

The financial asset is retained in the business model of financial assets held to collect contractual cash flow.

The objective from this business model is to collect contractual cash flow which represented in principle and interest.

The sale is an exceptional event for the purpose of this model and under the terms of the standard represented in following:

- Significant deterioration for the issuer of financial instrument;
- Lowest sales in terms of rotation and value;
- A clear and reliable documentation process for the justification of each sale and its conformity with the requirements of the standard.

Financial assets classified as fair value through other comprehensive income

The financial asset is retained in the business model of financial assets held to collect contractual cash flows and sales.

- Held to collect contractual cash flows and sales are integrated to achieve the objective of the model.
- Sales are high in terms of turnover and value as compared to the business model retained for the collection of contractual cash flows.

Financial assets classified as fair value through profit or loss

The financial asset is held in other business models including trading, management of financial assets at fair value, maximization of cash flows through sale.

The objective of the business model is not to retain the financial asset for the collection of contractual or retained cash flows for the collection of contractual cash flows and sales.

Collecting contractual cash flows is an incidental event for the objective of the model.

The characteristics of the business model are as follows:

- Structuring a set of activities designed to extract specific outputs.
- Represents a complete framework for a specific activity (inputs - activities - outputs).
- One business model can include sub-business models.

2.I Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a legally enforceable right to offset the recognized amounts and there is an intention to be settled on a net basis, or realize the asset and settle the liability simultaneously.

Agreements of repos and reverse repos are shown by the net in the financial statement in treasury bills and other governmental notes.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.J Interest income and expense

Interest income and expense for all financial instruments except for those classified as held-for-trading or designated at fair value are recognized in “Interest income” and “Interest expense” in the income statement using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant year, The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate a shorter period to the net carrying amount of the financial asset or financial liability, When calculating the effective interest rate, the Bank estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses, The calculation includes all fees and points paid or received between parties of the contract that represent an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once loans or debts are classified as non-performing or impaired, the revenue of interest income will not be recognized and will be recorded off balance sheet, and are recognized as income subsequently based on a cash basis according to the following:

- When all arrears are collected for consumer loans, personal mortgage and micro-finance loans.
- When calculated interest For corporate are capitalized according to the rescheduling agreement condition until paying 25 % from rescheduled payments for a minimum performing period of one year, if the customer continues to perform, the calculated interest will be recognized in interest income [interest on the performing rescheduling agreement balance] without the marginalized before the rescheduling agreement which will be recognized in interest income after the settlement of the outstanding loan balance.

2.K Fees and commission income

Fees charged for servicing a loan or facility that is measured at amortized cost, are recognized as revenue as the service is provided fees and commissions on non-performing or impaired loans or receivable cease to be recognized as income and are rather recorded off balance sheet, These are recognized as revenue, on a cash basis, only when interest income on those loans is recognized in profit and loss, at that time, fees and commissions that present an integral part of the effective interest rate of a financial asset, are treated as an adjustment to the effective interest rate of the financial asset.

Commitment fees and related direct costs for loans and advances where draw down is probable are deferred and recognized as an adjustment to the effective interest on the loans drawn, commitment fees in relation to facilities where draw down is not probable are recognized at the maturity of the term of the commitment.

Fees are recognized on the debt instruments that are measured at fair value through profit and loss on initial recognition and syndicated loan fees received by the bank are recognized when the syndication has been completed and the bank does not hold any portion of it or holds a part at the same effective interest rate used for the other participants portions.

Commission and fees arising from negotiation, or participating in the negotiation of a transaction for a third party such as the arrangement of the acquisition of shares of other securities and the purchase or sale of properties are recognized upon completion of the underlying transaction in the income statement. Other management advisory and service fees are recognized based on the applicable service contracts, usually on accrual basis, financial planning fees related to investment funds are recognized steadily over the period in which the service is provided the same principle is applied for wealth management; financial planning and custody services that are provided on the long term are recognized on the accrual basis also.

2.L Dividend income

Dividends are recognized in the income statement when the right to collect it is declared.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.M Sale and repurchase agreements

Securities may be lent or sold according to commitment to repurchase (REPOs) are reclassified in the financial statement and deducted from Treasury Bills balance, Securities borrowed or purchased according to a commitment to resell them (reverse REPOs) are reclassified in the financial statement and added to treasury bills balance, The difference between sale and repurchase price is treated as interest and accrued over the life of the agreement using the effective interest rate method.

2.N Impairment of financial assets

Financial Policies applied starting from January 01, 2019

The bank reviews all its financial assets, except those classified as at fair value through profit or loss, to assess whether an indication exists that these assets have suffered an impairment loss as described below:

Financial assets are classified at three stages at each reporting date:

- Stage 1: Financial assets that have not experienced a significant increase in credit risk since the date of initial recognition, and the expected credit loss is calculated for 12 months.
- Stage 2: Financial assets that have experienced a significant increase in credit risk since the initial recognition or the date on which the investments are made, the expected credit loss is calculated over the life of the asset.
- Stage 3: Impairment of financial assets whose expected credit loss is to be recognized over the life of the asset on the basis of the difference between the carrying amount of the instrument and the present value of expected future cash flows.

Credit losses and impairment losses on the value of financial instruments are measured as follows:

- The low risk financial instrument is classified at initial recognition in the first stage and credit risk is monitored continuously by the Bank's credit risk management.
- If it is determined that there has been a significant increase in credit risk since the initial recognition, the financial instrument is transferred to the second stage where it is not yet considered impaired at this stage.
- Financial instrument, it is transferred to the third stage.
- The financial assets created or acquired by the Bank and include a high credit risk ratio for the Bank's low risk financial assets are recognized on the initial recognition of the second stage directly and therefore the expected credit losses are measured on the basis of expected credit losses over the life of the asset.

Significant increase in credit risk

The Bank considers that the financial instrument has experienced a significant increase in the credit risk when one or more of the following quantitative and qualitative criteria, as well as the factors relating to default, have been met.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.0 Impairment of financial assets – continued

- **Quantitative factors**

When the probability of default over the remaining life of the instrument is increased from the date of the financial position compared to the probability of default over the remaining life expected at initial recognition in accordance with the Bank's acceptable risk structure.

- **Qualitative factors**

If the borrower encounters one or more of the following events:

- The borrower submits a request to convert short-term to long-term payments due to negative effects on the borrower's cash flows.
- Extension of the deadline for repayment at the borrower's request.
- Frequent Past dues over the previous 12 months.
- Future adverse economic changes affecting the borrower's future cash flows.

Corporate loans and medium businesses

If the borrower has a follow-up list and / or financial instrument faced one or more of the following events:

- A significant increase in the rate of return on the financial asset as a result of increased credit risk.
- Significant negative changes in the activity and physical or economic conditions in which the borrower operates.
- Scheduling request as a result of difficulties facing the borrower.
- Significant negative changes in actual or expected operating results or cash flows.
- Future economic changes affecting the borrower's future cash flows.
- Early indicators of cash flow / liquidity problems such as delays in servicing creditors / business loans.
- Cancellation of a direct facility by the bank due to the high credit risk of the borrower.

Unpayments

The loans and facilities of institutions, medium, small, micro and retail banking are included in stage two if the period of non-payment is more than 60 days and less than 90 days. Note that this period (60 days) will be reduced by (10) days per year to become (30) days during (3) years from the date of application non payment period has been decreased to become (40) days during the period ended 30 June 2021

Transfer between three stages (1,2,3):

- **Transfer from second stage to first stage:**

The financial asset shall not be transferred from the second stage to the first stage unless all the quantitative and qualitative elements of the first stage are met and the full arrears of the financial asset and the proceeds are paid.

- **Transfer from third stage to second stage:**

The financial asset shall not be transferred from the third stage to the second stage until all the following conditions have been met:

- Completion of all quantitative and qualitative elements of the second stage.
- Repayment of 25% of the balance of the outstanding financial assets, including accrued segregated / statistical interest.
- Regularity of payment for at least 12 months.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.P Intangible assets

Software (computer programs)

Expenditures related to the development or maintenance of computer programs, are to be charged on income statement, as incurred, Expenditures connected directly with specific software and which are subject to the Bank's control and expected to produce future economic benefits exceeding their cost for more than one year, are to be recognized as an intangible asset, The expenses include staff cost of the team involved in software upgrading, in addition to a portion of overhead expenses.

The expenditures that lead to the development of computer software beyond their original specifications are recognized as an upgrading cost and are added to the original software cost.

The computer software cost is recognized as an asset that is amortized over the expected useful life time not exceeding four years, except for the main software for the bank that is amortized over 10 years.

2.Q Other assets

Non-current Assets held for Sale

Non-current assets are classified as non-current assets held for sale if it is expected to recover their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This includes assets bought for loans settlement, fixed assets which the bank suspends their use to sell it, and the subsidiaries and associates companies which the bank buy for the purpose of selling them.

The asset (or disposal group) must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets.

The asset (or disposal group) that is classified as assets held for sale based on the book value in the classification date, or the fair value deducting the sale costs whichever is less.

If the bank changes the sale plan, the book value of the asset will be modified to the amount by which the asset would have been measured in case it was not classified as an asset held for sale taking into consideration any value decline. As for assets gained against loans settlement, if the bank fails to sell them within the legally set period, the bank should form 10% from the asset value annually as a general bank risk reserve

The changes in the value of non-current assets held for sale, the profit and loss of sale shall be acknowledged in the item other operating revenues (expenses).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.R Fixed assets

Land and buildings comprise mainly branches and offices, all property, plant and equipment are stated at historical cost less depreciation and impairment losses, Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or as a separate asset, as appropriate, only when it is probable that future economic benefits will flow to the bank and the cost of the item can be measured reliably, all other repairs and Maintenance are charged to other operating expenses during the financial period in which they are incurred.

Land is not depreciated; Depreciation of other assets is calculated using the straight-line method to allocate their residual values over estimated useful lives, as follows:

- Buildings	50	Years
- Safes	40	Years
- Furniture	10	Years
- Tools and Machinery	8	Years
- Fixtures and Fitting	8	Years
- Equipment	5	Years
- Computers	8	Years
- Transportation	5	Years

The assets residual values and useful lives are reviewed, and adjusted if appropriate, on each balance sheet date, depreciable assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recovered, An asset's carrying amount is written down immediately to its recoverable value if the asset's carrying amount exceeds its estimated recoverable amount, The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Gains and losses on disposals are determined by comparing the selling proceeds with asset carrying amount and charge to other operating Income expenses in the income statement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.U Impairment of non-financial assets

Assets that have an indefinite useful life are not amortized and are tested annually for impairment, assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstance indicate that the carrying amount may not be recoverable, an impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount.

The recoverable amount is the higher of an asset's fair value less costs to sell or value in use, Assets are tested for impairment with reference to the lowest level of cash generating unit(s), a previously recognized impairment loss relating to a fixed asset may be reversed in part or in full when a change in circumstance leads to a change in the estimates used to determine the fixed asset's recoverable amount, The carrying amount of the fixed asset will only be increased up to the amount that the original impairment not been recognized.

2.T Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash and non-restricted balances with central banks, treasury bills and other eligible bills, loans and advances to banks, amounts due from other banks and short-term government securities.

2.U Other provisions

Provisions for restructuring costs and legal claims are recognized when the Bank has present legal or constructive obligation as a result of past events; where it is more likely than not that a transfer of economic benefit will be necessary to settle the obligation, and it can be reliably estimated.

In case of similar obligations, the related cash outflow should be determined in order to settle these obligations as a group, The provision is recognized even in case of minor probability that cash outflow will occur for an item of these obligations.

When a provision is wholly or partially no longer required, it is reversed through profit or loss under other operating income (expense),

Provisions for obligations, order than those for credit risk or employee benefits, due within more than 12 month from the balance sheet date are recognized based on the present value of the best estimate of the consideration required to settle the present obligation on the balance sheet date, An appropriate pretax discount rate that reflects the time value of money is used to calculate the present value of such provisions, For obligations due within less than twelve months from the balance sheet date, provision are calculated based on undiscounted expected cash outflows unless the time value of money has significant impact on the amount of provision, then it is measured at the present value.

2.V Employee's benefits

2.V.1 Social insurance

The bank contributes to the social insurance scheme related to the Social Insurance Authority for the benefit of its employees; the income statement is charged with these contributions on an accrual basis and is included in the employee's benefit account.

2.V.2 Profit share

The Bank pay a percentage of the cash profits expected to be distributed as employee's profit share through item "dividends declared" in the owners' equity, and as liability when the its approved by the shareholders general assembly, There is no recorded liability for the employees share in the unpaid dividends portion.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

2. Summary of significant accounting policies – continued

2.R Employee's benefits - continued

2.V.3 Other retirement liability

The bank provides healthcare benefits to retirees and usually the benefits are granted under the condition that the retiree has reached the retirement age when employed by the bank and completes the minimum required service period, the expected costs are accrued during the period of services rendered by the employee under the defined benefit plans accounting method.

2.V.4 Employee stock ownership plan (ESOP)

The extraordinary general assembly meeting held on 9 May 2017 approved the establishment of the employee stock ownership plan (ESOP) by granting after amending the bank's article of association according to the decision of the extraordinary general assembly meeting held on 23 March 2016 based on a proposal from the bank's board of directors on 29 February 2016, this plan will be applied on 9 August 2017 which is the date of the approval of the Egyptian Financial Supervisory Authority (EFSA) on this plan in accordance with the law.

Equity securities of this plan will be granted to the bank's executive members, departments' heads, general managers, first line managers and employees of the bank based on their annual performance and appraisal according to the bank's financial performance and personal performance report based on his functional grade.

Equity securities granted to employees are measured by reference to the fair value (market price) at the date on which they are granted. Equity securities are revaluated to the fair value (market price) at each reporting date, together with a corresponding revaluation differences in reserve in equity at the balance sheet.

2.W Income tax

Income tax on the profit and loss for the year and deferred tax are recognized in the income statement except for income tax relating to items of equity that are recognized directly in equity.

The income tax is recognized based on net taxable profit using the tax rates applicable on the date of the balance sheet in addition to tax adjustments for previous years.

Deferred taxes arising from temporary time differences between the book value of assets and liabilities are recognized in accordance with the principles of accounting and value according to the foundation of the tax, this is determining the value of deferred tax on the expected manner to realize or settle the values of assets and liabilities, using tax rates applicable on the date of the balance sheet.

Deferred taxes assets of the bank recognized when there is likely to be possible to achieve profits subject to tax in the future to be possible through to use that asset, And is reducing the value of deferred tax assets with part of that will come from tax benefit expected during the following years that in the case of expected high benefit tax, deferred tax assets will increase within the limits of the above reduced.

2.X Borrowings

Borrowings are recognized initially at fair value net of transaction costs incurred. Borrowings are subsequently stated at amortized cost.

2.Y Capital Dividends

Dividends on ordinary shares and profit sharing are recognized as a charge of equity upon the general assembly approval, Profit sharing include the employee' Profit share and the board of director' remuneration as prescribed by the bank's articles of incorporation and the corporate law.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management

The Bank's activities expose it to variety financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks, Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business, The bank's aim is therefore to achieve an appropriate balance between risk and rewards and minimize potential adverse effect on the Bank's financial performance, The most important types of financial risks are credit risk, market risk, liquidity risk and other operating risks, Also market risk includes exchange rate risk, rate of return risk and other prices risks.

The bank's risk management policies are designed to identify and analyze these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems, the bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management is carried out by risk department under policies approved by the Board of Directors; Bank treasury identifies, evaluates and hedges financial risks in close co-operation with the bank's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments; In addition, credit risk management is responsible for the independent review of risk management and control environment.

3.A Credit risk

The Bank takes on exposure to credit risk, which is the risk that counterparty will cause a financial loss for the bank by failing to discharge an obligation, Management therefore carefully manages its exposure to credit risk, Credit exposures arise principally in loans and advances, dept., securities and other bills, There is also credit risk in off-balance sheet financial arrangement such as loan commitments, The credit risk management and control are centralized in a credit risk Management team in bank treasury and reported to the Board of Directors and Heads of each business unit regular.

3.A.1 Credit risk measurement

Loans and advances to banks and customers

In measuring credit risk of Loans and facilities to banks and customers at counterparty level, the bank reflect three components.

- The 'probability of default' by the client or counterparty on its contractual obligation.
- Current exposures to the counterparty and its likely future development, from which the bank derive the 'exposure at default'.
- The likely recovery ratio on the defaulted obligation (the 'loss given default').

These credit risk measurements, which reflect expected loss (expected loss model) are required by the Basel committee on banking regulations and the supervisory practices (the Basel committee), and are embedded in the bank's daily operational management, The operational measurements can be contrasted with impairment allowance required under EAS 26, which are based on losses that have been incurred on the balance sheet data (incurred loss model) rather than expected losses.

3. Financial risk management – continued

3.A Credit risk – continued

3.A.1 Credit risk measurement – continued

The bank assesses the probability of default of individual counterparties using internal rating tools tailored to the various categories of counterparty, they have been developed internally and combine statistical analysis with credit officer judgment and are validated, where appropriate, clients of the bank are segmented into four rating classes, the bank's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class, this means that; In principle, exposures migrate between classes as the assessment of their probability of default changes, the rating tools are kept under review and upgraded as necessary, the bank regularly validates the performance of the rating and their predictive power with regard to default events.

Bank's internal ratings scale

Bank's rating	Description of the grade
1	Performing loans
2	Regular watching
3	Watch list
4	Non-performing loans

The amount of default represent the outstanding balances at the time when a late settlement occurred for example the loans expected amount of default represent its book value, for commitments the default amount represents all actual withdrawals in addition to any withdrawals that occurred till the date of the late payment if any.

Loss given default or loss severity represents the bank expectation of the extent of loss on a claim should default occur, It is expressed as percentage loss per unit of exposure and typically varies by type of counterparty, type and seniority of claim and availability of collateral or other credit mitigation.

Debt instruments, treasury bills and other bills

For Debt instruments and bills external rating such as standard and poor's rating or their equivalents are used for managing of the credit risk exposures, and if this rating is not available, then other ways similar to those used with the credit customers are uses, the investments in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirement at the same time.

3.A.2 Risk limit and mitigation policies

The bank manages, limit and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and banks, and to industries and countries.

The bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments, such risks are monitored on revolving basis and subject to an annual or more frequent review, when considered necessary, Limits on the level of credit risk by individual, counterparties, product, and industry sector and by country are approved quarterly by the board of directors

The exposure to any one borrower including banks and brokers is further restricted by sub-limits covering on and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts, actual exposures against limits are monitored daily.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.A Credit risk – continued

3.A.2 Risk limit and mitigation policies – continued

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

Some other specific control and mitigation measures are outlined below:

Collaterals

The bank sets a range of policies and practices to mitigate credit risk, the most traditional of these is the taking of security for funds advances, which is common practice, the bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation, The principal collateral types for loans and advances are:

- Mortgages over residential properties.
- Mortgages Business assets such as machines and inventory.
- Mortgages financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities are generally secured; revolving individual credit facilities are generally unsecured, in addition, in order to minimize the credit loss the bank will seek additional collaterals from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances are determined by the nature of the instrument, debt securities, treasury and other governmental securities are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

Master netting arrangements

The Bank further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions, master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on gross basis, However, the credit risk associated with favorable contracts is reduced by a master netting arrangement to the extent that if a default occurs, all amounts with the counterparty are terminated and settled on a net basis, the bank overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Credit related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required.

Guarantees and standby letters of credit carry the same credit risk as loans, documentary and commercial letters of credit - which are written undertakings by the bank on behalf of a customer authorizing a third party to draw drafts on the bank up to a stipulated amount under specific terms and condition - are collateralized by underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

Commitments to extend credit represent unused portion of authorizations to extend credit in the form of loans, guarantees or letters of credit, With respect to credit risk on commitments to extend credit, the bank is potentially exposed to loss in an amount equal to the total unused commitments, However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards, the bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.A Credit risk – continued

3.A.3 Impairment and provisioning policies

The internal rating systems focus more on credit-quality at the inception of lending and investment activities, Conversely, for only financial reporting purposes impairment losses are recognized for that has been incurred on the balance sheet date when there is an objective evidence of impairment. Due to the different methodologies applied, the amount of incurred impairment losses in balance sheet are usually lower than the amount determined from the expected loss model that is used for internal operational management and CBE regulation purposes.

The impairment provision reported in the balance sheet at the end of the period is derived from the four internal rating grades; However, the majority of the impairment provision comes from the last two rating degrees.

The following table illustrates the proportional distribution of loans and advances reported in the balance sheet for each of the four internal credit risk ratings of the bank and their relevant impairment losses:

Bank's rating	Loans and advances		Impairment losses provision	
	% 31 December 2021	% 31 December 2020	% 31 December 2021	% 31 December 2020
Performing loans	%30.55	%33.48	%0.19	%0.54
Regular watching	%57.29	%55.34	%5.25	%7.21
Watch list	%6.32	%6.34	%22.48	%27.85
Non-performing loans	%5.84	%4.84	%72.08	%64.40
	%100	%100	%100	%100

The internal rating tools assists management to determine whether objective evidence of impairment exists under EAS 26, based on the following criteria set out by the bank:

- Cash flow difficulties experienced by the borrower or debtor
- Breach of loan covenants or conditions
- It is becoming probable that the borrower will enter bankruptcy or financial re-organization. Deterioration of the borrower's competitive position.
- Bank granted concessions may not be approved under normal circumstances due to economic, legal reasons and financial difficulties facing the borrower.
- Deterioration of the collateral value.
- Deterioration of the credit situation.

The Bank's policy requires the review of all financial assets that are above materiality thresholds at least annually or more regularly when circumstances require, impairment provision on individually assessed accounts are determined by an evaluation of the incurred loss at balance sheet date, and are applied to all significant accounts individually, The assessment normally encompasses collateral held (including re-confirmation of its enforceability) and the anticipated receipt for that individual account, collective Impairment provisions are provided portfolios of homogenous assets by using the available historical loss experience, experienced judgment and statistical techniques.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.A Credit risk – continued

3.A.4 Pattern of measure the general banking risk

In addition to the four categories of the bank's internal credit rating indicated in note (3.A.1) management classifies loans and advances based on more detailed subgroups in accordance with the CBE regulations, Assets exposed to credit risk in these categories are classified according to detailed rules and terms depending heavily on information relevant to the customer, his activity, financial position and his repayment track record.

The Bank calculates required provisions for impairment of assets exposed to credit risk, including commitments relating to credit on the basis of rates determined by CBE, In case, the provision required for impairment losses as per CBE credit worthiness rules exceeds the required provision by the application used in balance sheet preparation in accordance with Egyptian Accounting Standards, that excess shall be debited to retained earnings and carried to the equity section, such reserve is always adjusted, on a regular basis, by any increase or decrease so, that reserve shall always be equivalent to the amount of increase between the two provisions, such reserve is not available for distribution, note no. (30.A) represents the movement of general bank risk reserve during the financial year.

Below is a statement of institutional worthiness according to internal ratings, compared to CBE ratings and rates of provisions needed for assets impairment related to credit risk:

CBE rating	Categorization	Provision %	Internal rating	Categorization
1	Low risk	0	1	Performing loans
2	Average risk	1	1	Performing loans
3	Satisfactory risk	1	1	Performing loans
4	Reasonable risk	2	2	Regular watching
5	Acceptable risk	2	2	Regular watching
6	Marginally acceptable risk	3	3	Watch list
7	Watch list	5	3	Watch list
8	Substandard	20	4	Non – performing loans
9	Doubtful	50	4	Non – performing loans
10	Bad debts	100	4	Non – performing loans

3. Financial risk management – continued

3.B Market risk

The bank is exposed to market risks of the fair value or future cash flow fluctuation resulting from changes in market prices, Market risks arise from open market related to interest rate, currency, and equity products represented in each of which is exposed to general and specific market movements and changes in sensitivity levels of market rates or prices such as interest rates, foreign exchange rates and equity instrument prices, the bank divides its exposure to market risk into trading and non-trading portfolios.

The market risk management department is responsible for managing the market risks arising from trading and non-trading activities which are monitored by two separate teams, regular reports are submitted to the Board of Directors and each business unit head, trading portfolios include transactions where the Bank deals direct with clients or with the market; Non-trading portfolios include positions that primarily arise from the interest rate management of the group's retail and commercial banking assets and liabilities, non-trading portfolios also includes foreign exchange risk and equity instruments risks arising from the bank's held to maturity and available for sale investments.

3.B.1 Market risk measurement techniques

As part of market risk management the bank undertakes various hedging strategies and enters into swaps to match the interest rate risk associated with the fixed-rate long-term loans if the fair value option has been applied, the major measurement techniques used to control market risk are outlined below:

Stress Testing

Stress testing provides an indicator of the expected losses that may arise from sharp adverse circumstances, stress testing is designed to match business using standard analysis for specific scenarios, the stress testing is carried out by the bank treasury and includes risk factor stress testing where sharp movements are applied to each risk category and test emerging market stress, as emerging market are subject to sharp movements, and subject to special stress testing including possible events effect specific positions or regions - for example the stress outcome to a region applying a free currency rate, The results of the stress testing are reviewed by Top Management and the Board of Directors.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.B Market risk – continued

3.B.3 Interest rate risk

The bank is exposed to the effect of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Cash flow interest rate risk is the risk of fluctuation in future cash flows of a financial instrument due to changes in market interest rates. Fair value interest rate risk is the risk whereby the value of a financial instrument fluctuates because of changes in market interest rates, Interest margins may increase as a result of such changes but profit may decrease in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate reprising that may be undertaken and is monitored daily.

The table below summarizes the bank's exposure to interest rate risks. It includes the bank's financial instruments at carrying amounts, categorized by the earlier of re-pricing or contractual maturity dates:

	Up to one Month	1-3 Months	3-12 Months	1-5 years	Over 5 years	Total

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.C Liquidity risk

Liquidity risk represents difficulty encountering the bank in meeting its financial commitments when they fall due or to replace funds when they are withdrawn, this may result in failure in fulfilling the bank's obligation to repay to the depositors and fulfilling lending commitments.

Liquidity risk management

The bank's liquidity management process carried out by the market risk management department includes:

- Daily funding is managed by monitoring future cash flows to ensure that all requirements can be met, this includes availability of liquidity when due or borrowed by customers, to ensure that the Bank reaches its objective it maintains an active presence in global money markets.
- The Bank maintains a portfolio of highly marketable that ,are assumed to be easily liquidated in the event of an unforeseen interruption of cash flow
- Monitoring liquidity ratios are according to internal requirements and Central Bank of Egypt requirements,
- Managing loans concentration and dues.

For monitoring and reporting purposes, the Bank calculates the expected cash flow and liquidity are expected and monitored on the next day, week and month basis, which are the main times to manage liquidity the starting point to calculate these expectations is through analyzing the financial liabilities dues and expected financial assets collections.

The market risk management department monitors the mismatch between medium term assets, the level and nature of unused loans limits, overdraft utilizations, and the effect of contingent liabilities such as letters of guarantees and letters of credit.

Assets available to meet all liabilities and cover loan commitments include cash, balances with central banks, due from banks, treasury bills, other governmental notes and loans and credit facilities to banks and clients. Maturity term is extended for a part of clients' loans that are maturing within a year in the normal course of the bank's business. Moreover, some debt instruments, treasury bills and other governmental notes are pledged to cover liabilities. The Bank has the ability to meet unexpected net cash flows through selling securities, and finding other financing sources.

Due from banks				

Fair value of placements and deposits bearing variable interest rate for one day is its current value, the expected fair value for deposits bearing variable interest is based on the discounted cash flow using rate of similar loans of similar credit risk and due dates.

Loans and advances to banks

Loans and advances to banks are represented in loans other than deposits held in banks, fair value expected for loans and advances represents the discounted value of future cash flows expected to be collected and cash flows are discounted using the current market interest rate to determine the fair value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.D Fair value of financial assets and liabilities – continued

3.D.1 Financial instruments not measured at fair value – continued

Loans and advances to customers

Loans and advances are net of provisions for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

Financial investments

Financial investments shown in the above schedule includes only held to maturity assets investments; as available for sale investments are measured at fair value except for equity instruments for which the market value can't be reliably determined, Fair value of held-to-maturity investments is based on market prices or broker prices, Fair value is estimated using quoted market prices for securities with similar credit and maturity and yield characteristics where information is not available.

Due to banks and customers

The estimated fair value of deposits of indefinite maturity which includes interest-free deposits is the amount paid on call.

The estimated fair value of fixed interest-bearing deposits and other loans not traded in an active market is based on discounted cash flows using interest rates for new debts of similar maturity dates.

Issued debt instrument

Total Fair value is calculated based on current financial markets' rates. As for securities that have no active market, discounted cash flows model is used in the first time according to the current rate applicable to the remaining period till maturity date.

3.E Capital management

For capital management purpose, the bank's capital includes total equity as reported in the balance sheet plus some other elements that are managed as capital; the bank manages its capital to ensure that the following objectives are achieved:

- Compliance with the legally imposed capital requirement in Egypt.
- Protecting the bank's ability to continue as a going concern and enabling it to generate yield for shareholders and other parties dealing with the bank.
- Maintaining a strong capital base to enhance growth of the bank's operations.

Capital adequacy and the use of regulatory capital are monitored on a daily basis by the bank's management. Employing techniques based on the guidelines developed by the Basel committee as implemented by the banking supervision unit in the central bank of Egypt on a quarterly basis.

The CBE requires the bank to comply with the following:

- Maintaining EGP 500 million as a minimum requirement for the issued and paid-up capital.
- Maintaining a minimum level of capital adequacy ratio of 11.875%, calculated as the ratio between total value of the capital elements, and the risk weighted average of the bank's assets and contingent liabilities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.E Capital management – continued

According to new instructions issued in 18 December 2012:

The numerator of the capital adequacy ratio consists of the following two tiers:

Tier One:

Consists of two parts which are continuous basic paid in capital and additional basic paid in capital.

Tier Two:

Is the supported paid in capital and consist of:

- 45% from positive foreign currencies translation reserve.
- 45% from special reserve.
- 45% from fair value increment over the book value for financial investments. (Positive portion only)
- 45% from fair value reserve balance for financial investment available for sale.
- 45% from fair value increment over the book value for financial investments held for maturity.
- 45% from fair value increment over the book value for financial investments in associates and affiliates.
- Financial instruments with embedded derivative.
- Loans (Supportive deposits with 20% amortization from its value each year from the last five years from its maturity).
- Impairment loss provision for performing loans, advances and contingent liabilities (should not be more than 1.25% from total performing weighted assets and weighted contingent liabilities, also impairment loss provision for non-performing loans, advances and contingent liabilities should be sufficient to meet liabilities for which the provision was created).
- 50% disposals from tier 1 and 2.
- Assets reverted to the bank value in general banking risk reserve.
- When calculating the numerator of capital adequacy ratio, the rules limits the subordinated deposits to no more than 50% of tier1 after exclusion.
- Assets and contingent liabilities are weighted by credit risk, market risk and operational risk.

For denominator of capital adequacy ratio consists of:

- Credit risk
- Market risk
- Operational risk

Assets risk weight scale ranging from zero to 100% is based on the counterparty risk to reflect the related credit risk scheme, taking into consideration the cash collaterals.

Similar criteria are used for off balance sheet items after adjustments to reflect the nature of contingency and the potential loss of those amounts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.E Capital management – continued

The tables below summarize the capital adequacy ratio according to Basel II for the current and previous years:

	31 December 2021 In thousand EGP	31 December 2020 In thousand EGP
Tier 1 capital		
Issued and paid up capital	4,100,622	3,623,749
Legal reserve	420,479	358,016
Other reserves	30,394	29,788
General risk reserve	208,750	208,750
Retained earnings	70,683	71,552
Additional capital	595,608	539,956
Total other comprehensive income	129,014	479,523
Total deductions from tier 1 capital	(193,383)	(157,779)
Total qualifying tier 1 capital	5,362,167	5,153,555
Tier 2 capital		
Impairment provision for loans and regular contingent liabilities and debt instruments stage 1	313,110	305,627
Subordinated deposits	1,664,419	1,665,266
Total qualifying tier 2 capital	1,977,529	1,970,893
Total capital 1+2	7,339,696	7,124,448
Risk weighted assets and contingent liabilities		
Total Credit risk	25,048,839	24,450,156
Total Market risk	--	--
Total Operation risk	4,186,270	3,708,422
The value of exceeding the limits set for employment in countries is weighted by risk weights	324,392	342,008
Top 50 concentration	--	--
Total risk weighted assets and contingent liabilities	29,559,501	28,500,586
Capital Adequacy Ratio (%)	%24.83	%25.00

- In the case of calculating the concentration of the largest 50 clients, the capital adequacy ratio decreases from 24.83 to 23.49%

3.F Leverage Financial Ratio

Central Bank of Egypt Board of Directors had approved in its meeting held on July 7, 2015 on special supervisory instructions related to leverage ratio which maintain a minimum level of leverage ratio of 3% to be reported in quarterly basis as following:

- Guidance ratio starting from reporting period September 2015 till 2017.
- Obligatory ratio started from year 2018.

This ratio will be included in Basel requirement tier 1 in order to maintain the Egyptian Banking System strong and safe, as long to keep up with the best international regulatory treatments. Leverage financial ratio reflect relationship between tier 1 for capital that is used in capital adequacy ratio (After Exclusions) and Banks' assets (on balance sheet and off-balance sheet) that are not risk weighted assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

3. Financial risk management – continued

3.G Leverage Financial Ratio – continued

Ratio Elements:

A- The numerator elements

The numerator consists of tier 1 (After Exclusions) for capital that is used in capital adequacy ratio in accordance with the requirements of the regulatory authority represented by the Central Bank of Egypt (CBE).

B-The denominator elements

The denominator consists of all bank assets (on balance sheet and off-balance sheet) according to financial statements called "Bank Exposure" which include total the following:

- 1- On the balance sheet exposure items after deducting some of tier 1 exclusions for capital base.
- 2- Financing financial papers operations exposures.
- 3- Off-balance sheet items (weighted by credit conversion factor).

The table below summarizes the leverage financial ratio:

	31/12/2021 In thousand EGP	31/12/2020 In thousand EGP
Tier 1 capital after exclusions	5,362,167	5,153,555
On-balance sheet items, derivatives and financing securities	80,136,113	71,713,586
Off-balance sheet items	2,292,744	2,111,173
Total exposures	82,428,857	73,824,759
Leverage Financial Ratio (%)	%6.51	%6.98

Liquidity coverage ratio and net stable fund ratio:

- Liquidity coverage ratio (LCR):

Liquidity coverage ratio aims to ensure that the bank maintains sufficient non-encumbered high quality liquid assets to meet the net outflows within the next 30 days under an unfavorable conditions scenario, and is calculated as follow:

Liquidity coverage ratio (LCR) = High quality liquid assets / Net outflows within 30 days.

This ratio shouldn't be less than 80% in 2017 and to gradually reach 100% by 2019.

For 31 December 2021 LCR ratio record LCY %250.56FCY 194.45%% and total of .%243.77

- Net stable fund ratio (NSFR):

Net stable fund ratio represents the relation between the available stable funding (the numerator) and the required stable funding (the denominator), this ratio seeks to face the mismatch of the long-term financing structure by encouraging banks to use a stable long-term fund sources for at least one year in order to cover assets' investments and any financing claims resulting from off-balance sheet commitments to help the bank to structure its fund sources. This ratio shouldn't be less than 100%, and is calculated as follow:

Net stable fund ratio (NSFR) = Available stable funding / required stable funding \geq 100%

For 31 December 2021 NSFR ratio record LCY %191.33 FCY %246.12and total of %198.66

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

4. Significant accounting estimates and assumptions

The bank makes subjective estimates and judgments that affect the reported amounts of assets and liabilities for the following financial year consistent estimations and judgments are continually evaluated based on historical experience and other factors including the expectations of future events that are believed to be reasonable.

4.A Impairment losses for loans and advances

The bank reviews the portfolio of loans and advance sat least quarterly to evaluate their impairment, the bank uses discretionary judgment on determining whether it is necessary to record impairment loss in the income statement, the bank has to identify if there is objective evidence indicating a decline in the expected future cash flows from loan portfolio before identifying any decline on individual basis, this evidence includes data indicating negative changes in a borrower's portfolio ability to repay to the bank or local or economic circumstances related to default, on scheduling future cash flows the management uses the past experience to determine the credit impairment loss for assets when there is objective evidence of impairment similar to that of the portfolio in question.

The methods and assumptions used in estimating both the amount and timing of the future cash flows are reviewed on a regular basis to minimize any discrepancy between the estimated loss and actual loss based on experience.

4.B Held-to-maturity investments

Non-derivatives financial assets with fixed or determinable payments and fixed maturity are classified as held to maturity, this classification requires high degree of judgment; In return the bank tests the intent and ability to hold such investments to maturity, if the bank fails to hold such investments till maturity except for certain circumstances (selling an insignificant amount of held-to-maturity investments near to maturity date) then all held to maturity investment portfolio should be reclassified as available for sale which will be measured at fair value instead of amortized cost, in addition the bank should suspend classifying investments as held to maturity caption.

If classification of investments as held to maturity is suspended the carrying amount shall decrease by

EGP 201,706,637 to reach its fair value by increasing the valuation reserve available for sale within the equity caption.

4.C Income tax

The bank is subject to income tax which requires the use of important estimates to calculate the income tax provision, there are a number of complicated processes and calculations to determine the final income tax, the bank records a liability related to the tax inspection estimated results, according to estimates of probabilities of extra taxes ,when there is a difference between the final result of the actual tax inspection and the amounts previously recorded by the bank such, differences affect the income and deferred tax provision at the year which the differences were noted.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

5. By activity segment

Activity segment include operations and assets used in providing banking services and managing related risks and yields which may differ from other activities, the segmentation analyses of operations according to the banking activities are as follows:

- **Large enterprises medium and small ones**
Activities include current accounts, deposits, overdrafts, loans, credit facilities and financial derivatives.
- **Investments**
Include merging companies, purchasing investments, financing company's restructure and financial instruments.
- **Individuals**
Activities include current accounts, savings, deposits, credit cards, personal loans and mortgage loans.
- **Other activities**
Include other banking activities such as fund management.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

37. Important Events

The outbreak of the coronavirus “COVID-19 pandemic” has spread across geographies globally, causing disruption to business and economic activities, which brought uncertainties in the local and global economic environment. Both domestic and global financial and monetary authorities have announced various support measures across the globe to address potential negative impacts.

Due to of the above, there is a tangible business disruption in many business sectors in the economic environment. The bank is closely monitoring the situation, as the bank has activated the business continuity plan and other risk management procedures to manage the potential business disruption due to this outbreak and its impact on the banking operations and financial performance of the bank.

Due to the uncertainty resulting from the outbreak and in anticipation of the expected economic slowdown. The bank is closely monitoring its portfolio of financial instruments to determine the impact of this outbreak on the various quantitative and qualitative factors to identify significant increases in credit risks (SICR) related to the sectors most affected by the crisis according to the best estimates, in light of the available information on previous events and current conditions, and based on the assumptions related to the expected economic performance.

The bank’s management started to study the formation of the necessary provisions expected to reduce the impact of this outbreak on the portfolio of financial instruments, loans and receivable during the current year.

Accordingly, the bank has started studying the potential impacts of the current economic volatility in determination of the reported amounts of the financial and non-financial assets of the bank at the end of March 2020, and these are considered to represent management's best assessment based on observable information. However, the markets remain volatile and the amounts disclosed remain sensitive to market fluctuations with the possibility of creating additional provisions as a precautionary step with the end of repayment holidays announced by the Central Bank of Egypt on 16 March 2020 to all borrowers in particular classes of financial instruments until the clarity of the actual performance of the portfolio.
